Powering the Future of Flight: Understanding Sustainable Aviation Fuel

Supports net zero targets by 2050

Uses sustainable feedstock such as used cooking oil

Produces up to 80% less lifecycle carbon emissions compared to traditional jet fuels

Can be blended up to 50% depending on the technology pathway

Used like regular jet fuel without any changes needed to the fueling infrastructure or aircraft

Aligns with international framework related to carbon emission reduction in aviation

From Waste to Wings: The Full Cycle of Sustainable Aviation Fuel

Feedstock is collected

First Gen

- Commercial technology
- Food vs. fuel
- Less sustainable

Second Gen

- Non-feed biomass and/or waste
- Sustainable

Fuel is delivered to airport and ready for take off.

Feedstock is converted to sustainable aviation fuel.

Traditional jet fuel is blended with sustainable aviation fuel to make it suitable for use in aircraft.

Clearing the Skies: Navigating the Environmental Impact of Flight

2%

of global greenhouse gas emissions are contributed by the aviation industry, while the overall transportation sector, including aviation, shipping, rail, and road, accounts for 24% of global GHG emissions.

source: IATA (International aviation transport association) and IEA (International energy agency)

81%

emissions from passenger travel

- 60% international flight
- 40% domestic flight

2025 Projections:

Aviation emissions are expected to grow to 1.8 billion tonnes of CO₂e by 2050, with the potential for 10 billion passengers.

REVELOT

LIMA FLIEGER

The Official Timekeeper for LIMA 2025
(Langkawi International Maritime & Aerospace Exhibition)

The Limited Edition Lima Flieger is a robust 42mm Pilot watch packed with unique materials such as Damascus Steel, Grade 5 Titanium and 3D casted luminous numeral blocks paired with the workhorse Japanese Miyota 9015 hi-beat movement for accuracy and reliability.

Founded in 2017 by a passionate watch enthusiast from Malaysia, Revelot set out to create timepieces that go beyond the realm of ordinary fashion watches.

Drawing subtle design inspiration from mid-century classics, brutalism, and the artistic influences of the iconic watchmaker Gerald Genta, Revelot's creations is a fusion between vintage icons and modern refinement.

LIMA 2025 EXHIBITION END

MIEC HALL - AEROSPACE

MIEC HALL OVERALL VIEWS

LEGENDS:

- A** Exhibition Hall A
- B** Exhibition Hall B
- C** Exhibition Hall C
- D** Exhibition Hall D
- Parking

NOTE:

LIMA 2025 will have three (3) registration entrances:

1. **Main Registration Entrance:** **1**
This entrance is located at the front of Hall A and features 15 counters, including Fast Lane options for those without luggage and Walk-In lanes.
2. **Second Registration Entrance:** **2**
Located inside the Dome of Experience, next to Hall D. This entrance has 10 counters, including Fast Lane options for those without luggage and Walk-In lanes.
3. **Third Registration Area:** **3**
This entrance is situated at the entrance gate next to Wings Hotel. No counters are provided here; it is designated for individuals with pre-printed badges only.

IMPORTANCE NOTES:

1. Please print your badges before coming to the exhibition hall to avoid being crowded. A lanyard and plastic cover are provided in the registration areas.
2. Only cars with official stickers (Delegations, Officials, Media, Services, Exhibitors, Police, Airport, Wings Hotel, and Organiser etc.) will be allowed to drive through via the Langkawi Airport and MIEC Hall. Vehicles without stickers will be diverted to Triang Road and Padang Mat Sirat Road and then toward Chenang. Trade Visitors and Public Visitors will have no car stickers.

Safer missions Protecting those who protect us all

In multi-domain operations, communications are critical in providing connectivity and situational awareness, enabling effective coordination and appropriate responses across near, close and deep operations.

Motorola Solutions can help your organisation orchestrate operations in a multi-domain environment with robust, resilient communications technology that can operate across the network, allowing you to share the right information with the right people at the right time.

Motorola Solutions technology stands ready with cutting-edge solutions designed for the toughest environments. Discover how we can help you achieve a dynamic, interconnected and better connected theatre of operations.

Rear Operations
Fortify the foundation.
Secure and scale your
communications.

Close Operations
Drive frontline excellence.
Bridge the gap with superior
communications.

Deep Operations
Go the distance for your most remote
missions. Cutting-edge tech for
unparalleled connectivity.

Aero, a leader in aircraft manufacturing since 1919, specializes in the development, design, production, and MRO of military and civilian aircraft. Building on decades of experience that produced the iconic L-39 Albatros and L-159 Alca light attack jet trainers, Aero now enhances the unique flight characteristics of its predecessors with the latest addition to the family – the L-39 Skyfox. The Skyfox is a next-generation subsonic jet designed for advanced pilot training and mission versatility.

AERODATA is a leading provider of complete solutions for airborne special missions, with the main focuses being airborne surveillance and flight inspection. For airborne surveillance the company offers its mission system AeroMission as part of complete airborne multi-mission solutions for maritime and land surveillance, oil spill surveillance and Search And Rescue. This includes the unique all-in-one belly-mounted OctoPod which AERODATA developed together with its subsidiary OPTIMARE.
